Professional Summary

Bachelor of Information Technology (BIT) undergraduate at the University of Moratuwa (Expected 2028). I am a **Full Stack Developer** with hands on experience in building secure, scalable, and user friendly web applications using the **MERN stack, Firebase, and MySQL**. Currently specializing in **Data Engineering**, I am expanding my expertise into building high scale data pipelines, orchestration with **Apache Airflow**, and big data processing using **Databricks and PySpark**. With a proven track record of developing certificate management systems and POS platforms, I am motivated to engineer clean code and contribute to high impact, data driven technology solutions within a professional software engineering environment.

Education

Bachelor of Information Technology (BIT)

University of Moratuwa, Sri Lanka

2026 – Present | Expected Graduation: 2028

Diploma in Software Engineering

National Apprentice and Industrial Training Authority (NAITA)

Aug 2023 – Dec 2025

Certificate in Computer Science

National Institute of Business Management (NIBM)

Mar 2023 – Jul 2023

G.C.E. Advanced Level – Technology Stream

St. Sylvester's College, Kandy

2020 – 2022

Technical Skills

- **Languages:** JavaScript (ES6+), Python, PHP, Java, Kotlin, Dart
- **Frontend:** React.js, Next.js, Vite, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion, Flutter
- **Backend:** Node.js, Express.js, RESTful APIs
- **Databases:** MySQL, MongoDB, PostgreSQL, Firebase (Firestore), SQLite
- **Version Control & Dev Tools:** Git, GitHub, VS Code, Postman, Chrome DevTools
- **Cloud & Services:** Google Cloud (Gemini API), EmailJS, Axios
- **Soft Skills:** Critical Thinking, Problem Solving, Effective Communication

Data Engineering Skills

- **Orchestration:** Apache Airflow
 - **Big Data:** Databricks, PySpark
 - **Cloud (GCP):** Gemini API
 - **Languages & Processing:** Python (Pandas, NumPy, PySpark), Advanced SQL
 - **Infrastructure & DevOps:** Docker (Containerization for Pipelines)
 - **AI Integration:** Vector Databases (Pinecone), LLM Orchestration
-

Work Experience

Full Stack Developer

Proxima Technologies (Pvt) Ltd – Kegalle, Sri Lanka

May 2025 – November 2025

- Developed a system used by jewellery staff to generate official gold certificates for customer purchases.
- Designed forms to accurately record jewellery details such as gold purity, weight, customer information, and certificate numbers.
- Built backend services to securely store certificate records in a database for future verification.
- Enabled jewellery images to be uploaded and linked with each certificate for authenticity proof.
- Automated PDF certificate generation so customers receive professionally formatted certificates instantly.
- Reduced paperwork and human error by converting the manual certification process into a digital workflow.

POS Furniture Management System

- Developed secure login system for admins and staff.
 - Implemented product, customer, and transaction modules.
 - Built admin dashboard for daily operations.
 - Improved data handling and system performance.
-

Projects

Shoe E-Commerce Website

React | Firebase | Firebase Auth | Full stack Web

- Built a full stack online retail platform with product browsing, category filtering, and detailed product pages, serving end to end customer journeys.
- Implemented secure user authentication (register, login, session management) using Firebase Auth, protecting all customer account data.
- Developed an admin dashboard enabling store managers to add, update, and delete products and user accounts with full CRUD operations.
- Integrated automated email notifications for sign ups and contact requests, reducing manual customer support effort.
- Added an AI chatbot to handle common customer queries and ensured full responsive design across mobile, tablet, and desktop.

Inventory Management System

Next.js 16 | PostgreSQL | Stack Auth | REST API | SQL

- Built a full stack inventory platform supporting product creation, stock tracking, low stock alerts, and real time inventory valuation.
- Implemented secure user authentication with Stack Auth, including protected routes and session management.
- Developed an interactive dashboard with 30 day activity charts, KPI metric cards, and visual stock status indicators.
- Optimized PostgreSQL queries with indexing for high performance search and pagination across large product inventories.

Fashion Store E-Commerce Mobile App

Flutter | Dart | GetX | GetStorage | MVC Architecture

- Developed a complete cross platform e commerce mobile app with product browsing, cart management, and full authentication flow across 10+ screens (splash, onboarding, sign-in, sign-up, forgot password).
- Implemented GetX state management for authentication, navigation, and light/dark theme switching, reducing boilerplate code across the app.
- Used GetStorage for local session persistence to track first time users and login state without a backend round trip.
- Structured the project using MVC architecture (controllers, models, views) to improve maintainability and scalability.

Library Management System

C# | MySQL | Desktop Application | CRUD Operations

- Built a desktop library management application to digitize daily operations including book inventory, member registration, and borrow/return tracking.
- Implemented full CRUD operations for books and members with input validation and reliable database transactions to prevent data inconsistencies.
- Developed a centralized dashboard giving librarians a single view of all library activity, replacing manual record keeping workflows.

AI Facial Landmark Detection System

React | TensorFlow.js | WebGL | Computer Vision | Real-time ML

- Built a real time facial landmark detection web app using a live webcam feed, tracking 468 facial keypoints for AR, emotion analysis, and posture tracking use cases.
- Leveraged WebGL hardware acceleration to maintain smooth frame rates during continuous landmark rendering on the live video stream.
- Designed a modern demo interface suitable for research and experimental AI applications.

Personal Finance & Budget Management App

Flutter | Dart | Clean Architecture | Mobile UI

- Developed a mobile finance tracking app allowing users to log, categorize, and review daily income and expense records in one place.
- Built budget management screens with spending vs limit monitoring and chronological transaction history views across income and expense categories.

- Structured the app with separated models, services, and screens following clean architecture principles for scalability and maintainability.
 - Designed onboarding screens for first time users and a personalized profile management screen.
-

Certificates

- **Certificate in Python Programming** – University of Moratuwa
 - **Certificate in Front-End Web Development** – University of Moratuwa
 - **Certificate in Server-Side Web Programming** – University of Moratuwa
 - **Certificate in Introduction to Software Quality Assurance (Software Tester)** – University of Moratuwa
 - **Certificate in Web Design For Beginners** – University of Moratuwa
 - **Certificate in Python For Beginners** – University of Moratuwa
 - **Certificate in Computer Science** – NIBM
 - **Certificate in Gemini For Google Workspace** – Google Cloud
 - **Certificate in Introduction to Cybersecurity** – Cisco Networking Academy
 - **Certificate in Introduction to Data Science** – Cisco Networking Academy
 - **Certificate in Applying AI Principles with Google Cloud** – Google Cloud
 - **Certificate in AI/ML Engineer - Stage 1** – SLIIT
 - **Certificate in AI/ML Engineer - Stage 2** – SLIIT
-

Additional Skills

- Strong analytical and data driven problem solving skills
- Experience working in team based development environments
- Passionate about full stack development, AI, and modern web technologies
